

IMPORTANT CHAIN SAFETY INSTRUCTIONS

for

Wind Resistant Roller Screens, Chain Operated

****PLEASE READ THESE INSTRUCTIONS CAREFULLY BEFORE INSTALLING THE CHAIN OPERATED ROLLER SCREEN****

CHILD SAFETY WARNING:

- Young children can be strangled by loops in cords and chains that operate this screen.
- Children can be strangled if the device is not installed correctly.
- Move beds, cots and furniture away from windows where chain operated blinds are fitted.
- Keep the instructions for future reference.

Your screen has been fitted with a new safety device: 2 part Clear Chain Safety Breakaway (Decorquip part number 400982)

The Clear Chain Safety Breakaway device has been tested in accordance with BS EN 16434: 2014 Internal Blinds, Clause 7.

The Clear Chain Safety Breakaway consists of two parts that are joined together (see diagram to the right).

Doors with the safety breakaway fitted - the bottom of the chain loop must be **MINIMUM 60cm** from the ground.

Windows with the safety breakaway fitted - the bottom of the chain loop must be a **MINIMUM of 60cm** from ground level.

*The chain supplied is made to the bottom of the window screen; however, we are unable to verify the final installed height of the chain in relation to ground level once installed. **It is therefore the owner's responsibility to ensure the final installation complies with current legal requirements.***

You can remove excess chain if necessary by simply unclipping the safety breakaway, cutting it to the required length and reattaching the safety breakaway. Check that the chain is running smoothly through the end cap and the screen is operating correctly.

TO OPERATE THE SCREEN PULL THE CHAIN FROM ABOVE THE SAFETY BREAKAWAY DEVICE

WARNINGS

- Test the connector if not used regularly
- Replace the connector if faulty
- The release of small components can result in asphyxiation of small children.
- Use of additional safety devices helps reduce the risk of strangulation but cannot be considered entirely fool-proof.
