

Magnetic Insect Screens for Windows

Keep insects out. Let fresh air in.

A made-to-measure magnetic screen that allows you to open and close your window without removing the screen, designed to fit neatly within your window frame.

Installation is quick and straightforward using self-adhesive fixing pads, with optional frame extensions available to neatly clear window handles. Suitable for most outward opening windows (subject to space and fixing surface).

Why Choose This Screen?

Enjoy fresh air without the hassle – the magnetic design lets you use your window as normal, without removing the screen. Each screen is made to measure for a precise, tidy fit, with no trimming required.

The low-profile frame sits discreetly within your window, and with no drilling needed, it's ideal for easy DIY installation. Additional frame sections can also be used where needed to accommodate protruding handles.

The maximum size for this screen is 1200mm x 1200mm.

We have tested and tried larger screens but find they are unwieldy, hard to manage and much harder to install. If you need something larger, please contact us.

Mesh Options

- Standard insect mesh (18x16) – keeps out common insects while allowing airflow
- Midge mesh (20x30) – finer weave for protection against smaller insects

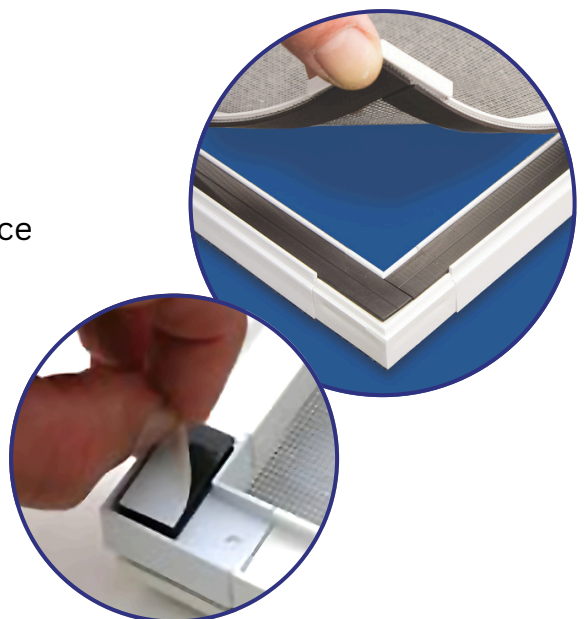

Product Details

- Magnetic opening for easy access
- Self-adhesive fixing pads
- White PVC frame with grey mesh as standard
- Optional additional frame sections for handle clearance

Before You Order

Please ensure there is at least 20mm of flat surface around your window for the screen to fix to. All screens are made to your exact measurements, so it's important to measure carefully.

Magnetic Insect Screens for Windows

Measuring Instructions

Step 1: Width

- Measure the window opening (aperture) at top, middle, bottom
- Use the smallest measurement

Step 2: Height

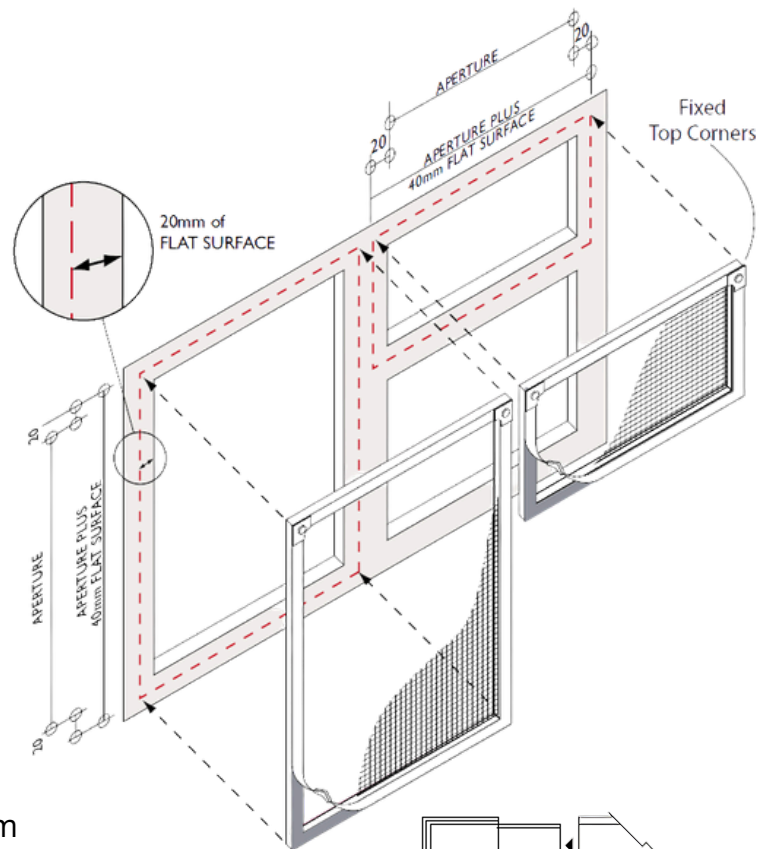

- Measure the window opening (aperture) at left, centre, right
- Use the smallest measurement

Step 3: Allow for Frame

- Make sure there's 20mm of flat surface all around
- Add 40mm to width and height

Final Order Size

- Width = smallest width + 40mm = ____ mm
- Height = smallest height + 40mm = ____ mm

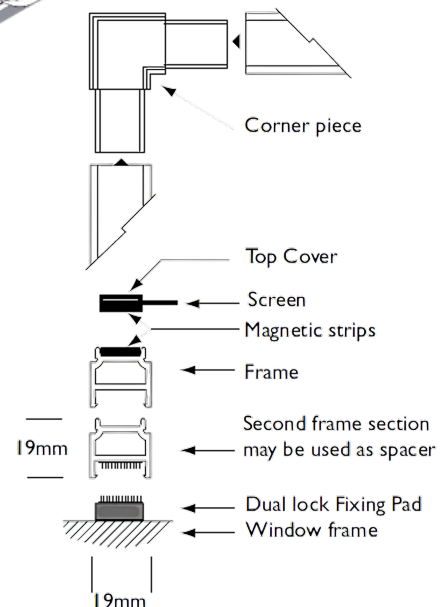

Allowing for Window Handles

If your handle sticks out, you may need additional frame sections. Measure the projection of your handle from the flat surface:

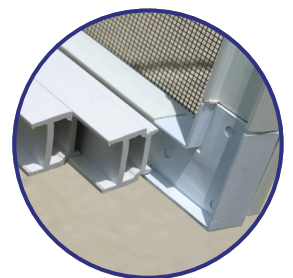

- Up to 22mm → Standard frame (no extra sections)
- 23–35mm → Add 1 extra frame (double frame)
- 36–48mm → Add 2 extra frames (triple frame)

If you're unsure, contact us before ordering

Important Notes

- Always measure in millimetres (mm) and provide sizes as width × height
- Include any bevelled edges in your measurements
- All screens are made to your measurements (±2mm tolerance applies), so it's important to measure carefully.
- No allowances or deductions are made by us
- Double check your measurements before ordering
