

Roller Doors - Side Mounted

Wind Resistant

Keep insects out. Let fresh air in.

A robust, side-mounted retractable screen designed for single and double doorways. The grey insect mesh pulls smoothly across the opening when needed and retracts neatly into the side cartridge when not in use.

Anti-wind brush strips help to hold the mesh securely within the top and bottom tracks, making this our most wind-resistant roller door screen.

This screen is suitable for reveal fitting only. If your door opens outwards, the screen is fitted on the inside; if it opens inwards, it is fitted on the outside.

Why Choose This Screen?

The wind-resistant roller door screen is a practical option for domestic and commercial doorways. Single screens close against a magnetic strip, while double screens meet in the middle.

Product Details

- White powder-coated aluminium cartridge and tracks
- Grey insect mesh
- Side-mounted retractable design
- Magnetic closing system
- Anti-wind brush strips
- Reveal fit only
- Suitable for single or double doors
- Made to measure
- Maximum single-door size: 1600mm wide × 2400mm high
- Maximum double-door size: 3000mm wide × 2400mm high

Before You Order

- Check there is enough space within the reveal for the cartridge and tracks.
- The screen includes a bottom track, which must sit securely against a level threshold.
- It may be necessary to raise or create a suitable threshold.
- This product is made to the measurements you provide, so please measure carefully.

Turn over for the step-by-step measuring guide.

Roller Doors - Side Mounted

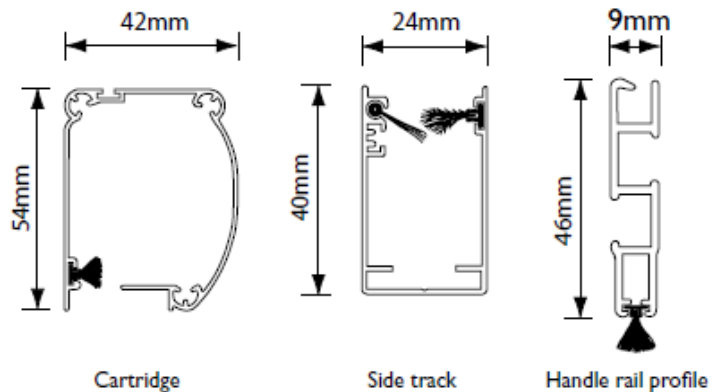

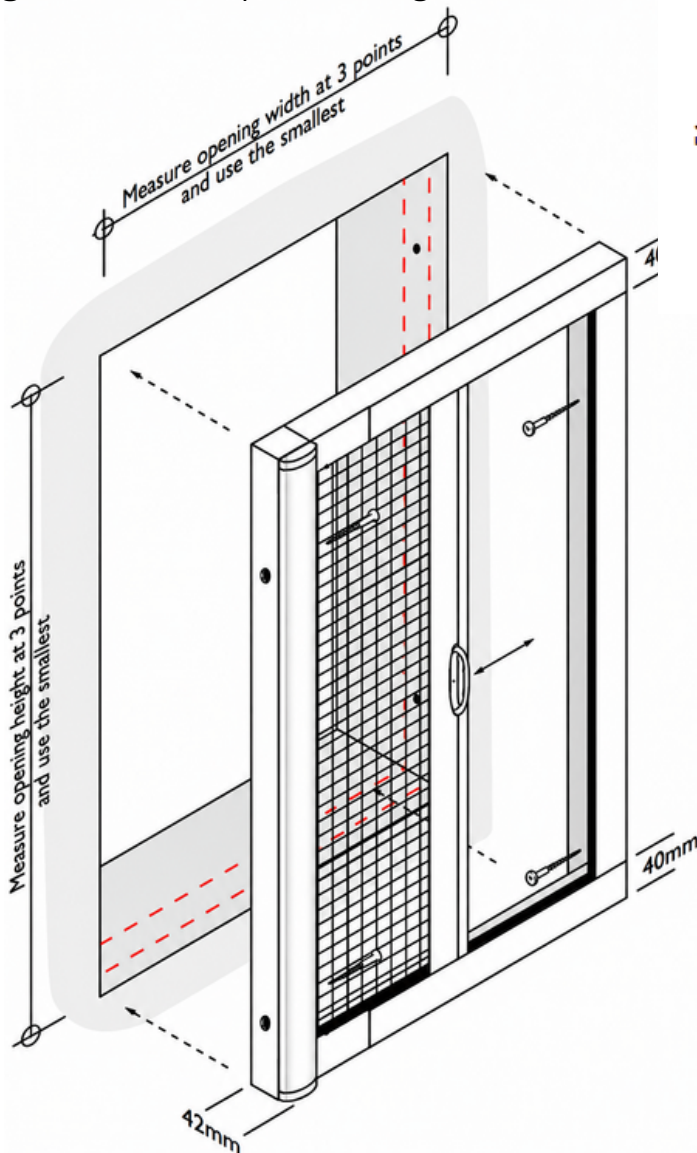

Measuring Instructions for Reveal Fit

Measure the width and height of the door aperture in three places and use the smallest measurement for each. Deduct 2mm from each dimension.

Width = smallest aperture width - 2mm

Height = smallest aperture height - 2mm

Double-door configuration – two retractable screens meet in the middle.

Important Notes

- Always measure in millimetres (mm) and provide sizes as width × height.
- Include any bevelled edges in your measurements.
- All screens are made to the measurements you provide. A manufacturing tolerance of $\pm 2\text{mm}$ applies, so it's important to measure carefully.
- We do not make any further allowances or deductions from the measurements you provide.
- Double-check your measurements before ordering.
