

Roller Window - Top Mounted

Wind Resistant

Keep insects out. Let fresh air in.

A robust, top-mounted retractable screen designed for windows. The grey fibreglass insect mesh pulls smoothly down across the opening when needed and retracts neatly into the top cartridge when not in use.

Anti-wind brush strips help to keep the mesh securely within the side tracks, making this our most wind-resistant roller window screen.

Why Choose This Screen?

Ideal for larger windows and exposed locations where a more secure retractable screen is required.

Product Details

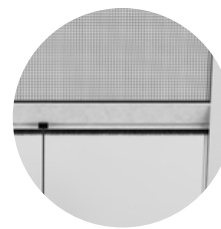

- White powder-coated aluminium cartridge and tracks
- Grey fibreglass insect mesh
- Top-mounted retractable design
- Anti-wind brush strips
- Handle or chain operation
- Special bottom bar/handle option for external fitting
- Suitable for internal or external fitting
- Reveal or face-fit options
- Made to measure
- Minimum width: 520mm
- Maximum size: 2000mm wide × 2480mm high

Bottom Bar

Before You Order

- Decide whether the screen will be reveal fitted or face fitted before measuring.
- Check there is sufficient flat fixing surface for the cartridge and side tracks.
- If fitting externally but operating the screen from inside, please specify this when ordering.
- Taller windows may require a rod and hook to reach the handle rail.
- This product is made to the measurements you provide, so please measure carefully.

Roller Window - Top Mounted

Wind Resistant

Measuring Instructions

Measure the width in three places — top, middle and bottom — and use the smallest measurement.

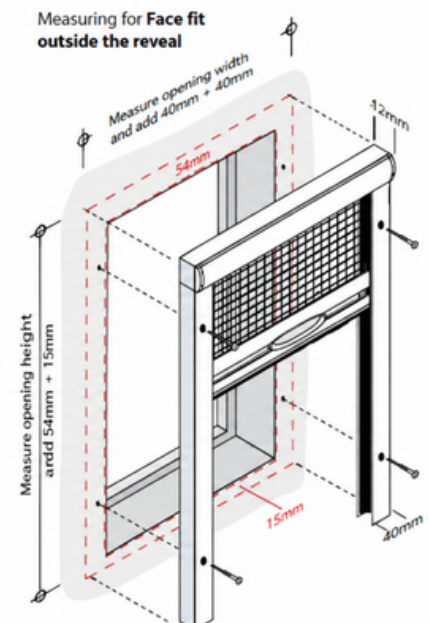

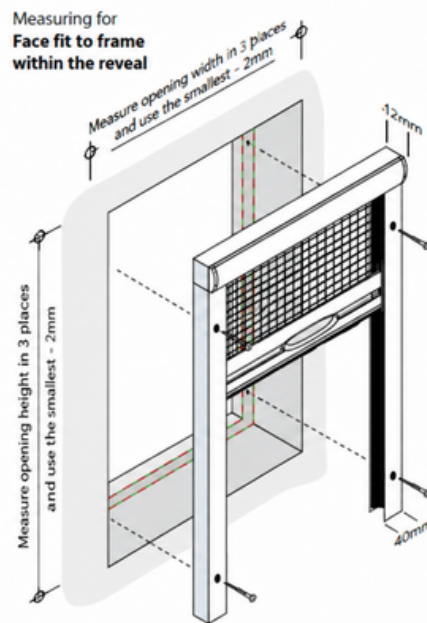

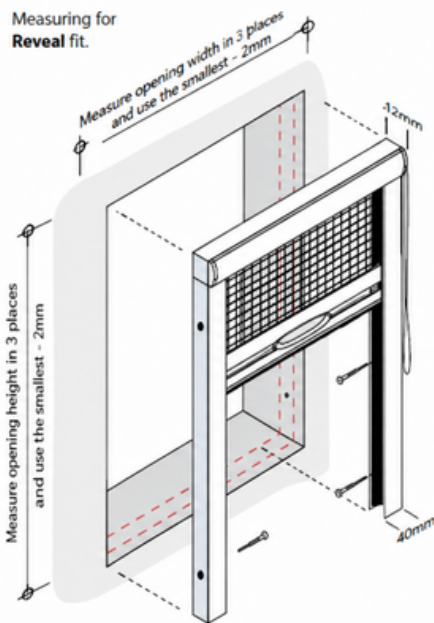

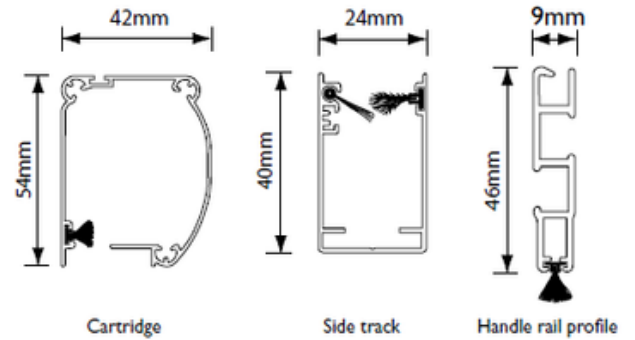

Measure the height in three places — left, centre and right — and use the smallest measurement.

Reveal Fit / Face Fit Within the Reveal

Deduct 2mm from both the smallest width and smallest height measurements.

Face Fit Outside the Reveal

Add 80mm to the smallest width measurement and 69mm to the smallest height measurement.

Important Notes

- Always measure in millimetres (mm) and provide sizes as width × height.
- Include any bevelled edges in your measurements.
- All screens are made to the measurements you provide. A manufacturing tolerance of $\pm 2\text{mm}$ applies, so it's important to measure carefully.
- We do not make any further allowances or deductions from the measurements you provide.
- Double-check your measurements before ordering.
